Summary

DevOps professional with 7+ years of experience in software development, cloud automation, and business process automation. Expertise in Python, PowerShell, Ansible, and REST APIs to automate workflows, improve system reliability, and drive operational efficiency. Proven track record of streamlining processes, reducing manual tasks, and enhancing system performance. Strong background in infrastructure automation and cloud platforms such as Azure and ServiceNow.

Technical Skills

Programming/Scripting : Python, PowerShell, JavaScript, Bash

Cloud Platforms : Azure (Runbook Automation, Active Directory, Graph API), ServiceNow Orchestration

DevOps & Automation Tools : Ansible, Jenkins, Git, Grafana, Prometheus

API Testing & Integration : Postman, Insomnia, REST APIs

Version Control : Git, GitHub, Bitbucket

CI/CD Tools: Jenkins, Azure Pipelines

Experience

Tech Mahindra

September 2023 – Present

Associate Team Lead

Bengaluru, India

- Led server-side automation projects using Python, PowerShell, and Ansible, reducing manual tasks by 30% and improving efficiency by 25%.
- Developed real-time monitoring with Grafana, reducing system downtime by 15%.
- Automated complex workflows, enhancing system performance by 20%.

HCL Technologies

September 2017 – September 2023

Specialist

Madurai, India

- Automated Active Directory and O365 workflows with PowerShell and Azure Automation, improving operational response times by 30%.
- Developed an Angular-based web portal, reducing manual tasks and boosting productivity by 20%.
- Streamlined user management and security processes using Snow Orchestrator and Azure Automation.
- Collaborated with teams to identify and implement automation opportunities, enhancing system performance and user experience.

Projects

Kubernetes: Automated **ETCD backups** and **certificate expiry monitoring**, enhancing cluster reliability.

Ansible: Automated **patching** and **post-cluster hardening**, improving compliance and reducing manual tasks by **50%**.

Azure: Developed **license management** and **runbook automation**, reducing manual efforts by **20%**.

Business Process: Streamlined **ServiceDeskFramework**, created **IT self-service utility**, and built **cloud reporting dashboards** to enhance IT management and automation processes. Spearheaded **End User Computing (EUC) automation**

Network: Automated **Cisco backups** and performance monitoring, increasing resilience and reducing downtime.

Power Apps & Power Automate: Built **inventory management** and **audit compliance** tools, improving data tracking and audit readiness.

Certifications

- Azure Administrator Associate
- Automating Infrastructure on Google Cloud with Terraform
- Google Cloud Computing Foundations: Cloud Computing Fundamentals

Education

St. Michael College of Engg & Tech

Jul 2012 – Aug 2016

Bachelor of Electronics and Communication Engineering

Madurai, Tamil Nadu
